

Press Release

TPG The Project Group expands partner network in Asia

Systemethod to sell TPG products in Singapore, Malaysia and Indonesia

Munich, Germany. 25 August 2009 – TPG The Project Group, a full-service provider of enterprise-wide project management (EPM) based on Microsoft Project Server and Sharepoint solutions, announced today that it has signed up Systemethod Pte. Ltd. as a new authorized partner in Asia. Systemethod, which is also a Microsoft Project Partner, is now selling and implementing TPG products in Singapore, Malaysia and Indonesia. These products extend the functionality of Microsoft Project Server solutions. Systemethod is putting a special focus on the TPG PSLink product that integrates Microsoft EPM with SAP.

TPG Managing Director Stavros Georgantzis hands over the TPG Authorized Partner Plate to Nah Wee Yang, CEO of Systemethod.

As part of a feasibility study for a customer project, Systemethod was researching solutions for integrating Microsoft Enterprise project Management (EPM) with SAP. The company heard about TPG and was impressed by the advantages of TPG PSLink and the many different ways it could be used. The early customer-related discussions between TPG and Systemethod subsequently led to the two companies deciding to form a partnership.

“Enhancing our offering with TPG products will open up new opportunities to sell our services and offer comprehensive solutions beyond the functionality of Microsoft EPM. Especially with TPG PSLink, we are able to implement a full customer scenario within hours,” says Mr. Nah Wee Yang, CEO of Systemethod.

The new partnership enables TPG The Project Group to further expand sales channels for its products for Microsoft Project and EPM. The company is committed to working in close cooperation with its partners around the world. Along with its new partnership with TPG, Systemethod is itself a highly experienced Microsoft EPM partner for the Asia-Pacific region and has a significant customer base covering all industry sectors. “The Asian market for project management solutions has been showing dynamic growth for several years now and still has huge potential,” says Stavros Georgantzis, founder and managing director of TPG. “Singapore plays a particularly important role in Southeast Asia, and we’re very pleased to have found an established local partner there specialized in project management and Microsoft EPM. Systemethod has many years of experience, detailed knowledge of the market and deep expertise, all of which make the company ideally suited for marketing TPG’s products in Singapore, Malaysia and Indonesia.”

TPG The Project Group has subsidiaries in Germany, Austria, the UK and the USA. The company also sells its products and services around the world via its partner network.
